

Spyridon (Spyros) Chatzivasileiadis

Office: Technical University of Denmark, Elektrovej, Building 325, 2800 Kgs. Lyngby, Denmark
e-mail: spchatz@elektro.dtu.dk, tel: +45-53-83-9658

Education

- | | |
|------|---|
| 2013 | ETH Zurich, Switzerland
PhD in Electrical Engineering (Power Systems Laboratory)
Advisor: Prof. Göran Andersson
Dissertation: "Power system planning and operation methods integrating the controllability of HVDC" |
| 2007 | National Technical University of Athens (NTUA), Greece
Diploma in Electrical and Computer Engineering
Advisor: Prof. Nikos Hatzigiorgianni
Thesis: "Development of a Control System for Islanded Power Systems based on Intelligent Agents Technology" |
| 2005 | Technische Universität München, Germany
Exchange Semester |
| 2002 | Geitonas High School, Greece
Apolytirion |

Further Education

- | | |
|----------------|--|
| 2017 – Current | Harvard Business School, MA, USA
Executive Leadership Program
Selected to attend an 1-year leadership program at Harvard Business School (on-campus and distance courses), supported by the "Pasteur Program 2017" of Innovation Fund Denmark. Learning about leadership, strategy and execution, negotiation, and management of innovation. |
| 2016 – 2017 | Technical University of Denmark, Denmark
Education in University Teaching at DTU
1½-year course on didactics and pedagogics for university teaching. Graduated with the citation: "dedicated and competent teacher able to understand the important factors in teaching which support student learning in an effective way" |

Research Experience

- | | |
|----------------|--|
| 2016 – Current | Technical University of Denmark, Denmark
Assistant Professor
Co-PI of the MULTI-DC project (25.7 million DKK). Technical lead of the Best Paths EU H2020 Project. Supervising or co-supervising five PhD students. Focus is currently on control and economic operation of combined AC and HVDC grids, and on data-driven techniques for power system stability. |
| 2015 – 2016 | Massachusetts Institute of Technology, MA, USA
Postdoctoral Researcher
Worked on the construction of convex stability certificates through semidefinite programming. Focus was on the incorporation of remedial actions which are offered through synthetic inertia, FACTS, and HVDC. |

2014 – 2015	<p>Lawrence Berkeley National Laboratory, CA, USA Postdoctoral Researcher</p> <p>Technical lead of a research project with 10 scientists to develop a cosimulation platform, called VirGIL, that integrates power system simulation, building modeling and controls for demand response, and communications systems. Applied for and got awarded a US \$5 million grant from the US Department of Energy (DOE) to develop VirGIL to a tool for utilities. Actively participated in the US DOE Scoping Study for DC microgrids. Participated in the ARPA-E project for the development and deployment of micro-synchrophasors in distribution grids. Member of the CIGRE WG C6.22: Microgrids Evolution Roadmap.</p>
2008 – 2014	<p>ETH Zurich, Switzerland Member of the Scientific Staff</p> <p>Worked on EU-sponsored IRENE-40 Project. Developed analytical approaches for network planning. Proposed the first Security-Constrained Optimal Power Flow formulation which takes into account the post-contingency control capabilities of VSC-HVDC lines. Led the task “Infrastructure Measures for Increased Power System Security”, involving three project partners (Partners: Siemens, Alstom Grid, ABB. Task duration: 12 months). Offered network consulting services to TenneT GmbH, Deutschland.</p>
2011	<p>University of Liège, Belgium Visiting Researcher</p> <p>Developed two concepts. The Global Grid puts forward the vision of a global electricity grid which will harvest remote renewable energy sources and supply load centers with green energy. The second concept, Towards a Fully Controllable Power System, proposes analytical approaches for the placement of controllable devices. The objective is to decouple market operations from security considerations, eliminating the “Cost of Security”.</p>
2007 – 2008	<p>NTUA Power Systems Laboratory, Greece Research Assistant</p> <p>Worked on EU-sponsored More Microgrids and EU-DEEP projects. Developed a distributed control algorithm based on machine learning techniques and Multi-Agent systems. Carried out one of the first field tests worldwide of Multi-agent technology in Microgrids (Kythnos island). Participated in the development of a Virtual Power Plant (VPP), involving three different sites.</p>

Teaching Experience

2016 – Current	<p>31765 - Optimization in modern power systems Course Responsible, Technical University of Denmark Designed and offering the course.</p>
2016 – Current	<p>31730 - Fundamentals of electric power engineering Course Responsible, Technical University of Denmark Teaching about half of the course material.</p>
2008 – 2012	<p>Electric Power Systems Teaching Assistant, ETH Zurich Offered the exercise sessions of the course. Held office hours. Prepared and graded the exams.</p>

Languages

English:	Fluent
German:	Fluent
French, Danish:	Basic knowledge
Greek:	Mother tongue

Computer Skills

Programming Languages: C, Python, Matlab, Java
Power Systems Software: Powerfactory, PSS/E, Neplan, Powerworld

Professional Activities

- since July 2017 Secretary of the Basil Papadias Best Paper Award Committee, and member of the International Advisory Committee of IEEE Powertech
- 2017-2018 Member of the Technical Program Committee of IET RPG 2018
- 2017-2018 Member of the Scientific Program Committee of Medpower 2018
- 2017 Member of the Technical Program Committee of GlobalSIP 2017 (Signal and Information Processing for Smart Grid Infrastructure)
- since 2017 CIGRE WG C1.35: Global electricity network feasibility study
- 2014-2016 CIGRE WG C6.22: Microgrids Evolution Roadmap
- since 2011 Serving as reviewer for IEEE Transactions on Power Systems, IEEE Transactions on Sustainable Energy, Electric Power Systems Research, IET Generation, Transmission, Distribution, IEEE Powertech, IEEE PES General Meeting, Power Systems Computation Conference (PSCC)

Other Activities

- 2006-2007 Organizing Committee — 1st National Student Conference of Electrical and Computer Engineers, Athens, Greece, 2007
Had the initiative and formed the Organizing Committee (12 members). The conference created a forum where Greek engineering students present their work, connect, exchange ideas, and listen to distinguished invited speakers (e.g., from UC Berkeley, MIT, GeorgiaTech, EPFL, Merrill Lynch, IBM, ABB). The 1st Conference was attended by 860 participants. Since 2007 it is organized by ECE students almost every year [Athens (2008), Thessaloniki (2009), Patras (2010), Xanthi (2012), Athens (2013), ...] with a peak of 1800 attendees in 2009.
- Summer 2004 Volunteerism
Spectator Assistant, Athens 2004 Olympic Games
- 1998-2001 Hellenic Mathematical Society
Succeeded in 4 Mathematical Contests and was selected as one of the top 25 students in Greece for the year 2000

Memberships

- since July 2004 Institute of Electrical and Electronic Engineers (IEEE)
Power and Energy Society (PES)
- since July 2009 Technical Chamber of Greece

Publications

PhD Thesis
